SUMMARY

Third-year Software Engineering Honours student at the University of Sydney with hands-on experience building and deploying full-stack applications using Python, Java, React, PostgreSQL and AWS. Experienced in REST APIs, automated testing, CI/CD, Docker and Agile development through university and personal projects. Seeking a Software Engineering Internship to contribute to production-oriented software development.

TECHNICAL SKILLS

- Languages: Python, Java, JavaScript, C, SQL, HTML/CSS
- Frameworks & Libraries: FastAPI, React, JUnit, pytest
- Databases: PostgreSQL, pgvector
- DevOps & Tools: Docker, AWS EC2, GitHub Actions, Jenkins, Git, Gradle, Linux
- Development: REST APIs, CI/CD, Automated Testing, Agile/Scrum

PROJECTS

RAG Document Assistant — Python, FastAPI, React, PostgreSQL/pgvector, Docker, AWS

- Built a full-stack Retrieval-Augmented Generation application enabling users to upload PDF documents and ask questions answered using document content.
- Developed the backend pipeline for PDF extraction, text chunking, embedding generation and vector similarity search using FastAPI, PostgreSQL/pgvector and sentence-transformers.
- Integrated the Gemini API for LLM-based answer generation and built a React frontend for document upload and question-answer interaction.
- Implemented unit and integration testing with pytest, including a separate test database and mocked LLM calls.
- Containerised the application with Docker and configured GitHub Actions CI/CD to run automated tests on every push.
- Deployed the backend to AWS EC2 with Nginx and HTTPS using Let's Encrypt, and hosted the frontend on Vercel.
- Resolved real-world deployment issues involving CORS, mixed-content security and text encoding.

Expense Tracker Web Application - React, Django REST Framework, PostgreSQL, REST API, Render, Git/GitHub

- Developed a full-stack expense tracking web application that allows users to securely register, log in, and manage their personal expenses.
- Built a RESTful backend using Django REST Framework with PostgreSQL for data persistence and API-based communication with the frontend.
- Implemented user authentication and password hashing, with user-specific expense data to ensure accounts can only access their own records.
- Developed the frontend to provide an intuitive interface for adding, editing, deleting, and viewing expense records.
- Deployed the application online with the backend hosted on Render and maintained the project using Git/GitHub.

Virtual Scroll Access System — Java, Gradle, JUnit, Jenkins, Git

- Developed a full-stack file management system with authentication, role-based access control and secure password storage as part of a 3-person Scrum team.
 - Implemented CI/CD using Jenkins, GitHub and Gradle with automated builds and unit tests, achieving over 75% code coverage.
 - Collaborated through Git branching, pull requests and code reviews across three Agile sprints.
 - Served as Product Owner, managing the backlog, prioritising features and demonstrating completed functionality to the client.
-

EDUCATION

University of Sydney — Sydney, Australia.

Bachelor of Engineering Honours (Software Engineering) | 2024–Present

- WAM: 77.5 | Expected Graduation: 2028
 - Relevant Coursework: Data Structures & Algorithms, Software Construction & Design, Agile Software Development, Data & Information Management, Object-Oriented Programming.
-

WORK EXPERIENCE

Room Attendant — Meriton Suites, Chatswood (Nov 2025 – Jun 2026)

- Maintained consistent quality and attention to detail while managing multiple tasks under time pressure.
- Independently managed daily workload and consistently met operational targets.

All Rounder / Barista — Leyrd (Jan 2026 – Mar 2026)

- Worked efficiently in a high-volume environment while maintaining accuracy, consistency and service quality.
- Coordinated with front-of-house and kitchen staff to support smooth operations during peak periods.

Front of House Staff — VietFull Restaurant (Feb 2025 – Jun 2025)

- Coordinated with kitchen and floor teams to provide accurate and efficient service.
 - Handled payments and customer requests in a fast-paced environment.
-

ADDITIONAL

- Vietnamese (Native)
- English (Professional - IELTS 7.5)
