SUMMARY

Third-year Software Engineering Honours student at the University of Sydney with experience building and deploying full-stack applications. Skilled in Python, Java, React, PostgreSQL, REST APIs, Docker, automated testing and CI/CD. Seeking a Software Engineering Internship in product-focused teams.

TECHNICAL SKILLS

- Languages: Python, Java, TypeScript, JavaScript, SQL, HTML/CSS
- Frameworks: React, Next.js, FastAPI, Django, Django REST Framework
- Cloud & DevOps: Docker, AWS EC2, GitHub Actions, Jenkins, Nginx, Vercel, Render
- Databases: PostgreSQL, pgvector, SQLite
- Testing & Tools: Vitest, pytest, JUnit, Git, GitHub, Gradle

PROJECTS

RAG Document Assistant | [GitHub](#) | [Live Demo](#) **(Python, FastAPI, React, PostgreSQL/pgvector, Docker, AWS)**

- Built and deployed a full-stack RAG application that lets users upload PDFs and receive document-grounded answers.
- Developed the FastAPI pipeline for PDF extraction, chunking, embeddings and vector search with PostgreSQL/pgvector; integrated Gemini API for answer generation.
- Built the React interface and implemented unit/integration tests with pytest, including mocked LLM calls and a separate test database.
- Containerised the app with Docker, configured GitHub Actions CI/CD, and deployed it to AWS EC2 with Nginx and HTTPS; resolved CORS, mixed-content and encoding issues.

Expense Tracker Web Application | [GitHub](#) | [Live Demo](#) **(React, Django REST Framework, PostgreSQL, REST API, Render, Git/GitHub)**

- Built and deployed a full-stack expense tracker with React and a Django REST Framework API backed by PostgreSQL.
- Implemented registration, authentication and user-scoped CRUD operations to ensure each user can access only their own expense data.
- Developed an intuitive interface for creating, editing, deleting and viewing expenses; deployed the backend on Render.

JobCompass | [GitHub](#) | [Live Demo](#) - Built during Futura Remix Hackathon 2026 **(Next.js, TypeScript, Gemini API, Adzuna API, Tailwind CSS, Vitest)**

- Built an AI-assisted platform that analyses job ads and recommends better-fit roles for international students.
- Designed a hybrid architecture where Gemini extracts grounded evidence and deterministic rules produce explainable Apply, Tailor, or Skip decisions.
- Integrated Adzuna for profile-based job ranking and blocker filtering; added regression tests for eligibility and recommendation logic.

EDUCATION

University of Sydney — Sydney, Australia.

Bachelor of Engineering Honours (Software Engineering) | 2024–Present

- WAM: 77.5/100 (Distinction average) | Expected Graduation: 2028
- Relevant Coursework: Data Structures & Algorithms, Software Construction & Design, Agile Software Development, Data & Information Management, Object-Oriented Programming.
